

FLOWRA

Employee Training Booklet

Tally Prime Analytics Platform

www.flowralive.in

1. What is FLOWRA?

FLOWRA is a cloud-based analytics platform that connects to Tally Prime and gives business owners real-time access to their data from anywhere.

Think of it as a smart dashboard that sits on top of Tally.

Key Value Proposition

- > Real-time Tally data on mobile/laptop - anywhere, anytime
- > Zero manual effort - auto-syncs every few minutes
- > Bank-grade 256-bit encryption - safer than email
- > 2-minute setup - download connector, login, done
- > No data migration - Tally remains your source of truth

Who is it for?

- > Distributors and wholesalers using Tally Prime
- > Business owners who travel and need remote access
- > Companies with multiple branches/depots
- > Accountants managing multiple company books

2. Product Features (What You Demo)

Dashboard

Total sales, items, low stock alerts, overdue payments, top customers. Cross-FY totals. Branch toggle to exclude internal transfers.

Sales

Sales trend chart, voucher list with drill-down, filter by customer/month/FY. PDF & Excel export.

CRM

Customer targets with achievement %, outstanding tracking, follow-up scheduler, payment behavior analysis with credit scoring.

Inventory

Real-time stock from Tally, low stock alerts, reorder levels. Search & filter by stock group/category.

Analytics

Movement Analysis (Opening/Inward/Sales/Closing), Below Cost Sales detection, Sales Frequency, Customer-Item breakdown.

AI Reports

AI-generated business insights. Purchase order recommendations.

Insider Result

P&L style business intelligence dashboard.

Branch Toggle

One-click filter to exclude branch/depot transfers from all figures. Shows actual customer sales vs internal transfers.

3. How Setup Works (Explain to Customer)

- > Step 1: Customer signs up at www.flowralive.in (free 14-day trial)
- > Step 2: Download Desktop Connector from Setup page
- > Step 3: Run the connector on the PC where Tally Prime is installed
- > Step 4: Connector auto-detects Tally and starts syncing
- > Step 5: Data appears in FLOWRA dashboard within 2 minutes
- >
- > Requirements: Tally Prime running on the PC, Internet connection
- > Port: Tally uses port 9000 by default (configurable)
- > The connector runs in background - no manual intervention needed

Technical Points (if customer asks)

- > Data is encrypted with 256-bit AES before transmission
- > Only analytics data is processed - raw vouchers are not stored
- > Each company gets a unique encrypted UUID - no data leakage
- > Multi-company support - one connector handles all Tally companies
- > Sync happens every 5 minutes automatically

4. Pricing (Memorize This)

Starter

Rs.999/mo or Rs.9,990/yr

1 Company, 2 Users | Dashboard, Sales, Inventory, Basic Analytics

Professional

Rs.2,499/mo or Rs.24,990/yr

3 Companies, 5 Users | Everything in Starter + CRM, AI Reports, Advanced Analytics

Enterprise

Rs.3,799/mo or Rs.37,990/yr

10 Companies, 20 Users | Everything + Salesman Module, Priority Support

Objection Handling

- > "Too expensive" -> Calculate time saved: 3-4 hrs/week x Rs.500/hr = Rs.8,000/mo saved minimum
- > "We already use Tally" -> FLOWRA does not replace Tally. It extends it to mobile/remote access
- > "Is my data safe?" -> 256-bit encryption, same grade as banks. No raw data on cloud
- > "Can I try before buying?" -> 14-day free trial, no credit card required
- > "What if Tally is not running?" -> Connector syncs when Tally is open. Last synced data always available

5. Demo Call Script (5-Minute Version)

- > 1. "Let me show you how FLOWRA works with your Tally data..."
- > 2. Open Dashboard - Show total sales, top customers, overdue payments
- > 3. Click Sales - Show voucher list, click a voucher for item details
- > 4. Click CRM > Targets - Show customer achievement tracking
- > 5. Click CRM > Payment Behavior - Show credit scores
- > 6. Click Inventory - Show stock levels, low stock alerts
- > 7. Click Analytics > Movement - Show opening/inward/sales/closing
- > 8. Toggle Branch filter - Show how figures change (actual vs transfers)
- > 9. Click Setup - Show the one-click Desktop Connector download
- > 10. "All of this syncs automatically from your Tally. No manual work."

Closing Lines

- > "Would you like to start a free 14-day trial?"
- > "I can help you set it up right now - it takes 2 minutes"
- > "Which plan fits your number of companies and users?"

6. Frequently Asked Questions

Q: Does FLOWRA work with all versions of Tally?

A: FLOWRA works with Tally Prime (latest). Tally ERP 9 is not supported.

Q: Can I access FLOWRA on my phone?

A: Yes! FLOWRA is fully responsive - works on mobile, tablet, and desktop browsers.

Q: What happens if my internet goes down?

A: The Desktop Connector queues data and syncs when internet returns. FLOWRA shows last synced data.

Q: Can multiple employees use FLOWRA?

A: Yes, based on your plan. Starter=2, Professional=5, Enterprise=20 users.

Q: How is FLOWRA different from Tally on Mobile?

A: Tally Mobile is basic data view. FLOWRA provides analytics, CRM, AI reports, movement analysis, and branch filtering.

Q: Can I manage multiple companies?

A: Yes. Professional supports 3 companies, Enterprise supports 10.

Q: What is the Branch Toggle?

A: It filters out inter-branch transfers (depot/division) from sales figures, showing actual customer sales only.

Q: Is there a mobile app?

A: FLOWRA works as a web app on mobile browsers. A dedicated app is on the roadmap.

Q: What if I cancel?

A: You can cancel anytime. Data sync stops but your Tally data is untouched.

Q: Do you offer custom pricing for large organizations?

A: Yes, contact us at support@flowralive.in for enterprise custom plans.
